REASONS FOR ALLOWANCE

1. Claims 1, 2, and 4 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claims 1 and 2 recite an anti-dazzling film, comprising: a transparent substrate film; and an anti-dazzling layer provided on one side of the transparent substrate film; wherein: the anti-dazzling layer comprises an ionizing radiation-curable resin, and transparent fine particles, and a leveling agent wherein the transparent fine particles consist of a single type of transparent fine particles and the transparent fine particles satisfy the claimed formulae which describe the particle size distribution of the transparent fine particles.

The prior art fails to disclose or render obvious an anti-dazzling layer wherein the transparent fine particles consist of a single type of transparent fine particles and the transparent fine particles satisfy the claimed formulae which describe the particle size distribution of the transparent fine particles. The claims of the instant application are limited to an anti-dazzling layer where the transparent fine particles in the anti-dazzling layer are only a single type of transparent fine particles. Applicants have stated that while the full language of the claim may be open language, the claims clearly recite closed language with respect to the transparent fine particles in the anti-dazzling layer, and thus are specifically limited to a single type of transparent fine particle.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 1794

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
